## SUMMARY

---

**Results-driven Frontend Engineer** with **4+ years of experience** specializing in **Angular, React**, and modern web technologies. Experienced in building **scalable enterprise applications**, **dynamic form systems**, **reusable UI component libraries**, and **data-driven dashboards**. Strong expertise in **TypeScript, RxJS, Redux, REST API integration**, **authentication systems**, **performance optimization**, and **component-based architecture**. Adaptive to deliver **high-quality solutions in Agile environments** while collaborating with cross-functional teams. Available for immediate joining and open to onsite, hybrid, remote, and contract opportunities across dynamic product and enterprise teams.

## TECHNICAL SKILLS

---

- **Frontend:** Angular (v11–19), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
- **Angular Ecosystem:** RxJS, Angular Signals, Reactive Forms, Angular CLI, Routing, Guards, Interceptors, Lazy Loading, State Management
- **UI Libraries:** Angular Material, PrimeNG, NG Bootstrap, AG Grid, Flex Layout
- **Data Visualization:** D3.js, dc.js, amCharts
- **Backend:** Node.js, Express.js, REST API Integration
- **Security:** OAuth2, OpenID Connect, Keycloak, RBAC, OWASP Practices
- **Testing:** Jasmine, Karma, Unit Testing, TDD
- **Tools:** Git, GitHub, GitLab, Postman, ESLint, Chrome DevTools, Lighthouse
- **Databases:** SQL, MongoDB
- **DevOps:** Azure Pipelines, CI/CD
- **AI Tools:** GitHub Copilot, Cursor AI, ChatGPT
- **Methodologies:** Agile, Scrum, Kanban

## PROFESSIONAL EXPERIENCE

---

### Senior Software Engineer I

*Sibiliti (Centelon Solutions)*

**Aug 2024 – Present**

*Pune, India*

- Implemented secure authentication using **Keycloak** with **OAuth2 / OpenID Connect**.
- Designed and implemented **Role-Based Access Control (RBAC)** for feature-level permissions.
- Developed enterprise-grade **reusable Angular components** and shared **UI modules**.
- Implemented **route guards** to detect **unsaved form changes**.
- Resolved **security vulnerabilities** and dependency issues identified during security audits.
- Delivered **pixel-perfect responsive UI** from **Figma** using **Angular Material, SCSS, Flexbox**, and **CSS Grid**.
- Optimized application performance using **lazy loading**, efficient **RxJS patterns**, and improved **change detection**.
- Integrated **RESTful APIs** and managed complex asynchronous data flows using **reactive programming**.
- Collaborated with cross-functional teams, participated in technical discussions, and contributed to frontend architecture decisions.
- Leveraged AI-assisted development tools including **GitHub Copilot** and **Cluade Code** for rapid UI scaffolding, debugging, code generation, and productivity optimization.
- Participated in **Agile ceremonies**, **sprint planning**, **backlog grooming**, and **peer code reviews**.

### Software Engineer I

*Sibiliti (Centelon Solutions)*

**Sep 2022 – Jul 2024**

*Pune, India*

- Developed **configurable dynamic forms** and reusable **data table components**.
- Built **interactive analytics dashboards** using **D3.js, dc.js**, and **amCharts**.

- Integrated backend services using **Angular services**, **RxJS operators**, and **REST APIs**.
- Developed complex UI including **nested tables**, **repeatable sections**, and **dependent dropdowns**.
- Implemented custom **Angular directives** for input masking and UI behavior.
- Built reusable **global search and filtering system** with **dynamic query builder**.
- Performed **Angular version upgrades** and **dependency migrations**.
- Maintained multiple Angular applications derived from a **shared base architecture**.

## Junior Software Engineer

Mar 2022 – Jul 2022

*Sibiliti (Centelon Solutions)*

*Pune, India*

- Assisted development of Angular modules using **Reactive Forms** and **Angular Material**.
- Implemented **pagination**, **sorting**, and **filtering** with backend API integration.
- Supported frontend feature development and **debugging enterprise applications**.

## PERSONAL PROJECTS

---

### Dynamic Form Builder – Angular Form Builder Platform

Oct 2025

*Personal Project*

- Developed a **drag-and-drop Angular form designer**.
- Implemented **field placement**, **resizing**, and **nested layouts** using **Angular Gridster**.
- Built **real-time preview** and **configuration panel**.
- Generated **JSON-based form schemas** for backend-driven form rendering.
- **Tech Stack:** Angular, TypeScript, Angular Material, Angular Gridster

## EDUCATION

---

### B.Tech – Electrical Engineering

Jul 2018 – May 2022

*KIT's College of Engineering*

*Kolhapur*

### Higher Secondary Education

Jun 2017 – May 2018

*N.S. Pantwalawalkar Junior College*

*Devgad*

## AWARDS

---

- **Stand Out Performer – Sibiliti (Mar 2025)** Recognized for **exceptional performance**, **technical ownership**, and delivering high-quality solutions.
- **Ace Alliance – Sibiliti (Sep 2023)** Awarded for **outstanding teamwork** and collaboration.

## CERTIFICATIONS

---

- **Angular – The Complete Guide (2025 Edition)** – 2025
- **Unit Testing JavaScript with Jasmine** – 2023
- **Build Responsive Real-World Websites with HTML and CSS** – 2022
